RARE *and* INTERESTING

Lilies

This is just a partial list of my Lilies and consists only of species and hybrids that have been tried in gardens all over the country including those in the 'deep' south and southern California. They have proven themselves perfectly hardy. This list contains all the latest introductions of Mr. Jan de Graaff of the famous Oregon Bulb Farms and we will continue to handle all the new Lilies developed by him, as soon as released. All bulbs will be shipped at the proper time; when they are freshly dug and with their roots alive and ready to grow. Please plant them as soon as they arrive to assure the best results.

Next year you will receive a more complete catalog containing descriptions of many more species and Hybrids that I am trying out in gardens throughout the country. I do not want to offer bulbs until I am sure of the locations in which they will do well.

Blooming time of Lilies is for Pacific Northwest. Southern California and the South will be a month to six weeks earlier.

DONALD W. STRYKER

Langlois, Oregon

Lilies

HYBRID LILIES

L. Aurelian Hybrids—Most important of all the new races of hybrids; crosses between L. Henryi and various white trumpet lilies. August blooming, plant 6" deep. Limited quantity of each of three type variations as follows:

(1) **"Heart's Desire"** Shallow, wide flaring 'bowl' shape, color from creamy white to orange.

3.00 each

(2) **"Sunburst"** Closely resembling L. Henryi, does not recurve so much, color from creamy white through deep orange.

3.00 each

(3) **"Golden Clarion"** More closely resembles the trumpet group. Colors from butter-yellow to creamy yellow.

3.00 each

L. Bellingham Hybrids—Ideal for grouping in the wild garden or for, bold clumps, leave undisturbed. The result of crossing some of the better west coast natives. Bloom, July, plant 5" deep.

.50 each—5.00 dozen

L. Olympic Hybrids—Crosses of all the major white trumpet lilies, tall strong stems. An extremely interesting new group of lilies. Bloom July, plant 5-6" deep.

.70 each—7.00 dozen

L. Olympic Hybrids "Selected"—These have been selected and tagged while in bloom as being outstanding variations in the group.

1.00 each

L. Olympic Hybrids "Pink Selections"—New and very limited. Large trumpets shaded from pink to fuchsia-pink.

3.50 each

L. Fiesta Hybrids—An entirely new race of Lilies resulting from crossing L. Davidii and related types. Color from bright yellow to dark red. Flowers from typical 'Turk's Cap' to upright forms. July flowering, plant 5" deep.

1.50 each

L. Golden Chalice Hybrids—Another instance where an entire group has been introduced rather than selected clones. All upright blooms, color range from clear lemon-yellow to gold and apricot-orange. June flowering, plant 6" deep.
1.00 each

Two selected outstanding clones from the above which have been released this year are:

L. Flamingo—Rich golden yellow-orange shading to Apricot-orange.
2.50 each

L. Radiance—Brilliant red spotted maroon.
2.50 each

L. Lillian Cummings—Similar to the Fiesta Group, this hybrid originated in Canada and has proven most satisfactory. Grenadine-red, blooms July, plant 5" deep.
1.25 each

L. Maxwell Hybrid closely resembling *L. Davidii* var. *Willmottiae* but which seems easier to grow. Blooms July, plant 5" deep.
.60 each, 6.00 dozen

SPECIES LILIES

L. amabile—attractive species from Korea 1½ to 3 ft. tall. Brilliant grenadine-red flowers spotted black. June flowering, plant 4".
.75 each, 6 for 4.00

L. amabile luteum—the rare yellow form of the type.
1.00 each, 6 for 5.50

L. auratum—The Gold Banded Lily of Japan. The most spectacular of all Lilies, long considered most difficult to grow but now with clean West Coast grown stock it is one of the easiest. Large bowl shaped blooms, white with a central band of yellow down each petal, spotted red to crimson, very fragrant. Blooms August, plant 6" deep.
1.75 each

Lilies

L. formosanum—Well known White trumpet type, this blooms late, August to September. Plant 5" deep.
.40 each, 4.00 dozen

L. Henryi—Nodding reflexed orange flowers. Stake stem and plant in partial shade to keep flowers from fading. Blooms August, plant 6" deep.
.80 each, 8.00 dozen

L. martagon album—A dainty nodding white lily for woodland. Blooms in June, plant 4" deep.
1.50 each

L. pardalinum giganteum—"Sunset Lily" Improved form of one of the best west coast natives, orange spotted maroon with red tips to petals. Plant with Bellingham Hybrids, 5" deep.
.40 each, 4.00 dozen

L. Sargentiae—White trumpet lily from China. Rosy purple reverse to petals, blooms 2 weeks later than Olympic Hybrids. Plant 6" deep.
2.00 each

L. speciosum album—Clear white form of Speciosum with Jade-green nectary furrow. Scarce. Plant 6" deep; late August flowering.
2.00 each

L. speciosum rubrum—My own form and one that has proven disease free and satisfactory in gardens all over the U. S. Blooms August, plant 5" deep.
1.50 each, 6 for 8.25

GUARANTEE

All bulbs are guaranteed true to name, up to size, clean and vigorous.

TERMS

Unless otherwise requested all bulbs will be shipped parcel post. Cash, money order or check should accompany the order unless credit has been established.

All bulbs shipped postpaid in the United States.
